Ashutoshpandeycodes / README.md

Hey everyone, myself Ashutosh Kumar Pandey. I am a fresher(1st year) at Vit Bhopal and pursuing Computer Science with a specialization in artificial intelligence and Machine Learning. I really want to deep dive into tech and learn how products are designed and deployed from the core and learn the various techniques required.

For my digital portfolio, I established a presence on GitHub, LinkedIn, and Kaggle.

GitHub is a foundational platform for version control and collaborative software development. Over the next four years, I plan to use it to host my web development projects, document my journey through complex software engineering concepts like system design and cloud computing, and actively contribute to open-source repositories.

LinkedIn serves as a professional networking hub where I can build my industry brand. I have updated my education details and intend to use the platform to connect with tech professionals, share insights from my learning journey, and ultimately secure internships and full-time roles in the tech industry.

Finally, Kaggle is the premier community for data science and machine learning. I will utilize Kaggle to practice working with diverse datasets, participate in predictive modeling competitions, and review notebooks from experienced data scientists to sharpen my AI and ML skills.

By actively maintaining these three profiles, I aim to transition from a student learning fundamental concepts to a capable software engineer with a proven, visible track record.
